

PUBLIC TRANSPARENCY REPORT

2023

Jennison Associates

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At Jennison, our primary objective is to generate superior long-term investment performance for our clients. We employ fundamental research to analyze different aspects of companies that could have an impact on risk or return, including those relating to ESG factors, in line with our belief that proprietary research and a holistic perspective are key to evaluating a company's investment prospects.

In our experience, where financially material, environmental, social, and governance (ESG) factors can affect the performance of a company and its securities, and we incorporate these factors into our investment processes by assessing the risks posed by these factors.

We seek to determine how the ESG profiles of current and prospective investments are likely to evolve by cultivating a deep understanding of issues and business dynamics.

This is done through fundamental research, dialogue and engagement with companies, and an objective assessment of relevant ESG factors. This bottom-up, fundamental approach to responsible investment is consistent with our approach to security research, which was established at our founding over 50 years ago.

In line with our commitment to responsible investment, we recently launched several Article 8 products. We also have a number of products in development which highlight a particular ESG focus, such as SDG alignment, decarbonation and other E or S focused strategies.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During the reporting year, our organization made significant progress in the realm of responsible investment, focusing on the most relevant and material ESG (Environmental, Social, and Governance) issues. Below are the key highlights of our accomplishments:

- Expansion of Our Dedicated ESG Team and Enhancements to our Proprietary Research Framework: In response to the growing importance of ESG considerations in investment decisions, we expanded our dedicated ESG Team in 2022. We also enhanced our proprietary ESG research framework, which serves as the foundation for our company-specific ESG assessments and guides our integration of ESG factors into investment strategies.

- Expansion of Investment Stewardship Process: We enhanced our investment stewardship process by implementing improved engagement logging and tracking mechanisms.

These enhancements allow us to better monitor and manage our interactions with portfolio companies on ESG matters. Additionally, we refined our approach to proxy voting by onboarding an additional proxy advisor to further inform our decision process, ensuring that our voting approach is consistent with our responsible investment principles.

- Engagement in Collaborative Initiatives: Our commitment to responsible investment is demonstrated by our active participation in collaborative sustainability and ESG initiatives. In 2022, we joined Climate Action 100+ initiative, as well as Ceres, further aligning our efforts with global leaders to drive positive change.

Building on our involvement from 2021, we remained members of Access to Medicine, TCFD (Task Force on Climate-related Financial Disclosures), CDP (Carbon Disclosure Project), and the IFRS Sustainability Alliance.

- Provide Input for ESG-Related Regulations: Our organization continued to advocate for responsible investment principles by contributing input to comment letters on proposed ESG-related regulations. By engaging constructively in the regulatory process, we aim to shape policies that foster transparency, accountability, and sustainable business practices.

Overall, our organization's journey in responsible investment over the reporting year has been marked by significant achievements, all reflecting our dedication to advancing responsible investment practices.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In the coming two years, our organization is dedicated to advancing our commitment to responsible investment through a comprehensive set of initiatives. These steps have been carefully outlined to reflect our evolving priorities and the dynamic nature of ESG considerations in the investment landscape:

- Appointment of Head of Sustainability and further expansion of the ESG team: We appointed a Head of Sustainability and added a new ESG research analyst. Our Head of Sustainability's experience in sustainable finance and ESG strategies will play a pivotal role in shaping and driving our responsible investment initiatives forward.

This addition underlines our commitment to continuously enhance our expertise in the field.

- Increased Focus on Climate Change: Recognizing the urgency of climate-related risks and opportunities, we will intensify our efforts to incorporate climate scenario analysis into our investment strategies.
- Continued Expansion of Data Sets: We understand the importance of reliable data in making informed ESG decisions. Thus, we will further expand our data sets by incorporating new third-party vendor data to ensure a more comprehensive and diverse range of reliable information sources.
- Publish Modern Day Slavery Statement and Carbon Statement: in order to more fully communicate our dedication and commitment to responsible investment, we plan to publish these statements, which will allow for additional transparency for our clients.
- Launch of Sustainable Strategies: In line with growing demand for ESG-integrated investment solutions, we plan to launch investment strategies focused on promoting the sustainable development goals and investing in decarbonization solutions.

By undertaking these specific steps, our organization aims to strengthen its position as a responsible investor. Our commitment to expanding coverage, deepening our focus on climate change, enhancing data sources, promoting transparency, and offering ESG-focused products reflects our dedication to generating sustainable long-term returns.

Stewardship, excluding (proxy) voting
(H) Hedge funds

We are currently in the process of expanding our ESG research coverage. When we started our formal ESG integration journey, we began with prioritizing coverage of long only equity assets, as they constitute a significantly larger portion of our AUM. Over time, we anticipate that we will have firmwide coverage in the form of bottom-up evaluations of E, S, and G risks. After that, we will be able to roll out stewardship activities, namely company engagement meetings where our methodology dictates it would add value, to currently uncovered asset classes.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

The ESG Team identifies and assesses climate-related risks in our company-specific risk assessments. We update these assessments periodically and also monitor climate-related controversy and other issue-related newsflow.

(2) Describe how this process is integrated into your overall risk management

The portfolio managers who manage risks holistically for their strategies can leverage the research of the ESG Team and/or the work of their own investment analysts to incorporate climate risk into the broader risk review process.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

For certain strategies, We will seek to ensure that the fund maintains a weighted average carbon intensity that is at least 50% lower than the weighted average carbon intensity of the benchmark. We also implement an exclusion screen that prohibits investment in securities issued by companies that fall within the exclusions criteria, including deriving revenues above a certain threshold from thermal coal mining, thermal coal generation, and Febelfin conventional and unconventional oil and gas.

(2) Describe how this process is integrated into your overall risk management

As mentioned above, the Jennison exclusion screen prohibits investment in securities issued by companies with revenues derived from thermal coal mining, thermal coal generation, and Febelfin conventional and unconventional oil and gas. We will then assess Carbon Intensity data of companies and then, based on this carbon intensity data, the manager will select investments so that the Fund's Weighted Average Carbon Intensity will be at least 50% lower than the WACI of the benchmark.
